INTELLIGENT VMI SOFTWARE

anglia80/20

Anglia 80/20 is a web based, real-time inventory management system closely linked into Anglia's core network, it has been designed to efficiently manage low cost commodity components, reduce errors and streamline your supply chain. The system lowers the entry level requirement for VMI for the UK's vibrant electronics manufacturing industries.

Anglia 80/20 reduces the time you spend on inventory administration and procurement, it also negates the cost of holding inventory as you only pay for it as you use it.

Anglia 80/20 gives you your own dedicated stock, on-site to be invoiced as used. We track usage and time of replenishment, ensuring your production line runs smoothly reducing the risk of line stops and delivery issues. There is no start-up, hardware or software cost and no ongoing subscription to pay, and most importantly your capital is not tied up in the inventory.

KEY BENEFITS

- Zero start-up cost
- Zero usage cost
- Zero lead-time on commodity components
- No hardware or software costs
- Save time on inventory management and procurement
- Reduce excess inventory and delivery costs
- Simple and easy to use
- Intelligent real time usage reporting
- Eliminate potential risk of line stops
- Only pay for the components as you use them
- Seamless integration into your existing system
- Consolidated monthly invoicing
